LITERACY TOOLBELT: UNLOCKING STUDENT POTENTIAL WITH UNIVERSAL TOOLS

TRAINERS: PATRICIA SULLIVAN & AMY TRAYNOR
ASSISTIVE TECHNOLOGY SUPPORT TEAM

Come learn about universally available tools and how they can be used with your student!

Join us to explore supports that already exist in our classrooms and at home that support literacy. Common technologies like speech to text, word prediction, alternatives to handwriting, graphic organizers and authoring tools can help provide equitable access to students with reading and writing challenges. We will explore supports in Google, Windows, and iOS platforms.

Please bring your own device!

Pick your session and register using QR code below:
